

Aberdeen Gates

Gates are closed at all times. (This practice began in October 2019 and has had a positive impact on the neighborhood.)

Access to the communication is handled by Management & Associates as follows:

1. Directory at the gate to reach a homeowner
 - a. Requires the homeowner's phone number be setup in the system, and a short dial-code assigned.
 - b. Upon receipt of a call from the gate, homeowner dials 9 for gate to open.

2. Access code entered on key pad
 - a. Homeowners have a private access code that should not be shared.
 - b. Vendor codes are updated quarterly and may be supplied by the homeowner or may be added to the vendor push notification
 - i. Vendor access codes are provided to homeowners 2 weeks prior to the quarter start and become effective immediately.
 - ii. Homeowners may add their vendor to the Quarterly Gate Code Notification List. Instructions on how to do this are on the Homeowner Logon section of the AberdeenELW.com website.

3. Remote opener
 - a. Obtained through Management & Associates
 - b. Cost = \$32.50 per opener
 - c. Proof of residency is required
